

APPENDIX II
CLEAN VERSION OF THE ENTIRE SET OF PENDING CLAIMS
PURSUANT TO 37 CFR § 1.121 (c)(3)

1. A composition, comprising purified antibodies directed to TNF- α and IL-6.
2. The composition of Claim 1, further comprising antibodies directed to gamma IFN.
3. The composition of Claim 1, wherein said antibodies are polyclonal antibodies.
4. The composition of Claim 3, wherein said polyclonal antibodies are avian antibodies.
5. The composition of Claim 4, wherein said avian antibodies are chicken antibodies.
6. The composition of Claim 5, wherein said chicken antibodies are derived from chicken eggs.
7. A method of treatment, comprising:
 - a) providing:
 - i) a mammal having symptoms of sepsis,
 - ii) a therapeutic preparation, comprising anti-TNF- α and anti-IL-6 antibodies; and
 - iii) administering said preparation to said mammal wherein said symptoms are reduced.
8. The method of Claim 7, wherein said therapeutic preparation further comprising anti-IFN antibodies.
9. The method of Claim 7, wherein said mammal is a human.
10. The method of Claim 7, wherein said administering is performed intravenously.

11. The method of Claim 7, wherein said administering is performed orally.
12. The method of Claim 7, wherein said administering is performed parenterally.
15. The method of Claim 7, wherein said antibodies are polyclonal antibodies.
16. The method of Claim 15, wherein said polyclonal antibodies are avian antibodies.
17. The method of Claim 16, wherein said avian antibodies are chicken antibodies.
18. The method of Claim 17, wherein said chicken antibodies are derived from chicken eggs.
19. A composition, comprising purified antibodies directed to TNF- α , IL-6 and gamma IFN.
20. The composition of Claim 19, wherein said antibodies are polyclonal antibodies.
21. The composition of Claim 20, wherein said polyclonal antibodies are avian antibodies.
22. The composition of Claim 20, wherein said avian antibodies are chicken antibodies.
23. The composition of Claim 22, wherein said chicken antibodies are derived from chicken eggs.
24. A method of treatment, comprising:
 - a) providing:
 - i) a mammal at risk for sepsis,
 - ii) a therapeutic preparation, comprising anti-TNF- α and anti-IL-6 antibodies; and
 - iii) administering said preparation to said mammal.

25. The method of Claim 24, wherein said therapeutic preparation further comprising anti-IFN antibodies.
26. The method of Claim 24, wherein said mammal is a human.
27. The method of Claim 24, wherein said administering is performed intravenously.
28. The method of Claim 24, wherein said administering is performed orally.
29. The method of Claim 24, wherein said administering is performed parenterally.
30. The method of Claim 24, wherein said antibodies are polyclonal antibodies.
31. The method of Claim 30, wherein said polyclonal antibodies are avian.
32. The method of Claim 31, wherein said avian antibodies are chicken antibodies.
33. The method of Claim 32, wherein said chicken antibodies are derived from chicken eggs.
